

RUHRSOURCE

Press Release 2016-02-19

3... 2... 1... BETA!

RUHRSOURCE startet Registrierung für die kommende BETA-Phase

The development of the **RUHRSOURCE** *Architecture Assistant* is on the finishing line. Therefore the startup from Bochum (Germany) is looking for dedicated **BETA** testers.

If you are interested in participate actively in the development process, [you can register here](#).

Excerpt from the features of the final release:

- Automated conversion of existing 2D or 2.5D CAD drawings from popular CAD programs
- Automated removal of 3D-printing unnecessary elements, such as cables, door and window handles, radiators, etc.
- Automated correction non-printable wall thicknesses
- Automated filling hollow areas
- Automated Adding supports to avoid overhangs

- Detail printing: Automated exemption and print preparation of a selection from a file to print, for example, a model of a gable, a staircase or handrail

Author: E. Christian Fleischmann (Founder/Marketing/PR)
